

BRANT RADIANT HEATERS LIMITED

DST Designer Series Patio Heater

The DST Designer Series combines application flexibility with chic, modern design. This low intensity, tube heater is specifically designed for comfort, reliability and ease of installation. The DST Designer Series is sure to deliver the desired amount of warmth across a vast number of hard to heat applications.

Features & Benefits

Smart LED -Self-Diagnostics

- Service issues can be diagnosed at the floor level using the LED diagnosing light.
- No need to access heater components.

BTU Selector: Three heaters in one (high/medium/low fire)

- Application flexibility – always the right fit.
- One heater fits all – no need to stock multiple units.

30 Linear Feet of Radiant Tube

The most radiant surface area of any 10 ft radiant patio heater available!

- Low exhaust temperatures.
- Increased efficiency – more heat transferred to the space.
- Even heat distribution & increased heat output.

Double-walled Enclosure w/ Polished Internal Reflector

- Low top clearance.
- Increased efficiency – More heat directed to the floor.

Unified Component Panel with Easy Access

All heater components on one easily accessed/removed panel

- Easily serviced.
- Decrease heater down time.

3/4" Modular Decorative Grille

- Easily removed for cleaning and servicing.
- Large openings enhances radiant output.
